W H O A M I ?

I am a passionate French student of IT. I have been passionate since my youth.

Curious and willing to learn, I am autonomous and know how to face new problems.

IT is a very mysterious domain and is full of discoveries. Being curious, this pushes me to explore and learn by myself.

I like all fields of IT, from programming to web development.

I am also interested by cyber security and low-level programming.

E D U C A T I O N

French secondary school Diploma with high honors.

Lycée Albert Châtelet, Saint-Pol-sur-Ternoise.

2017-2019

Two -year University degree in IT

IUT De Lens, SP 16, Rue de l'Université, 62307 Lens

2019-2020

W O R K E X P E R I E N C E

Discovery Internship

Residential home, La Juvènerie / 85 Route de Béthune, 62223 Sainte-Catherine / 2014

During this internship, I have seen the support of mentally deficient adults that doesn't suffer of troubles of comportment or autism. This opened my mind, even if it has no link with IT, I had a great experience during that internship.
